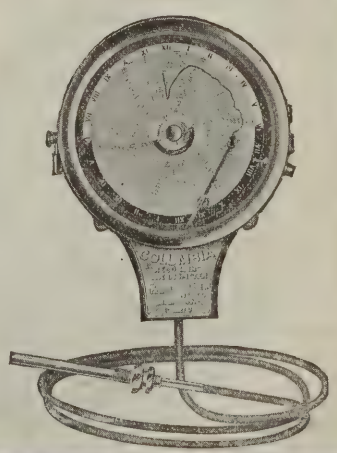
COLUMBIA Recording Thermometers

Respond instantly to slightest temperature changes and guaranteed accurate.

Clock movement is ruggedly built for long service. Will not corrode.



Time Punch makes a hole in disc at exact time button is pressed, thus acting as a time clock.

Removable arm makes renewal of chart easy and eliminates possibility of straining arm and affecting accuracy of records.

Renewable glass non-spilling and non-corroding pen insures dependable, readable records. Day and night chart has wider area than usual, giving a more readable record.

Tubing is fume, acid and water proof.

Write for Catalog No. N-15.

AERIAL TRAMWAYS

NO matter what the contour of the ground, we will construct a tramway that will transfer material at minimum expense; and no grades are too steep to surmount; no rivers or valleys too wide to cross; and no grading, bridges or viaducts of any kind are required. There is practically no limit to the length of these tramways.

Dependable Upson Board is made in four thicknesses, several widths, and many lengths.

A Size and Thickness for Every Purpose

To make Upson Board the board of a hundred uses for use in a thousand different ways, there's a size and thickness for every conceivable purpose. The most complete line of wall board made!

Not only is it the most dependable board for lining the walls and ceilings in every class of building—new or old—but it has hundreds of uses in manufacturing in place of thin lumber and veneer.

It is the hardest, *strongest*, and stiffest board made. Saws, cuts and handles just like high grade lumber. Its superior painting surface saves $5 to $15 per thousand feet in cost of decoration.

UPSON PROCESSED BOARD — **UPSON-BOARD** — UPSON PROCESSED BOARD

THE MOST DEPENDABLE BOARD MADE IN AMERICA

Thus the *little* difference in price does not measure the *big* difference in quality.

We will be glad to send you samples and literature.

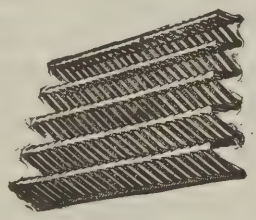
You Run No Risk with this line



The qualities of a good fireproofing material are the result of years of study and experience. The best satisfaction is therefore secured by buying a known, dependable line. Before purchasing write for prices.

Herringbone Rigid Metal Lath

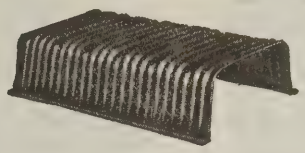
This lath offers many desirable features—rigidity, uniformity, wider stud spacing, and true economy in time, labor and plaster.

Trussit

Trussit is a corrugated expanded sheet, which forms the base and reinforcement for plaster walls and partitions. It eliminates the use of studding.

G. F. Self-Sentering

This combined reinforcing material and form decking for concrete floors, roofs and walls fills every need for speed, economy and permanence in building.



G. F. Steel Lumber

Used instead of wood for joists and studs in floor and partition work. For safety, economy and fireproofing it is ideal.

G. F. Peds

Peds, as "spot grounds" for attaching wood or metal trim to walls and sleepers to concrete floors save time, labor and material.

G. F. Steel Tile

These are light steel forms of various depths for use with concrete in joisted floor construction. They offer unusual economy combined with strength.

Welding and Cutting Outfits

REGO torches will not flash back.
REGO torches will not burn the weld.
REGO torches will not carbonize the weld.
REGO torches will make a better weld.
REGO torches will do a better cutting job.
REGO torches will give better service.

Saving in Oxygen Consumption, through the REGO principle of gas mixture, runs from $300 to $500 a year per torch in average service, as compared with others. Tip maintenance charges are reduced 90%.

SPROCKET WHEELS

Last many times as long as ordinary cast-iron wheels, and cost but little more. Each wheel is accurately fitted to a standard chain of correct pitch. The life of the chain is prolonged, because the wheels do not wear away rapidly from the proper pitch diameter. Send for price list and full particulars.
